

# Supervisor Field Check

Hand Protection: Match the Glove to the Task | v1.0 | October 6, 2026

Task / location: \_\_\_\_\_

Date / time / shift: \_\_\_\_\_ Leader: \_\_\_\_\_

JHA/JSA reference / revision: \_\_\_\_\_

Change or conditions confirmed unchanged: \_\_\_\_\_

## Short leader check

Mark V = verified, H = hold/not verified, or N/A with a reason. Support each result with evidence below or a referenced task record; a blank is not a pass.

| Check                                                                       | V / H / N/A |
|-----------------------------------------------------------------------------|-------------|
| Task and remaining hand hazards identified after stronger controls.         |             |
| Exact glove model matched to task and documented selection.                 |             |
| Chemical conditions and replacement/use limits verified where relevant.     |             |
| Condition, fit, grip and compatibility with the method checked safely.      |             |
| Entanglement restrictions, replacement supply and stop response understood. |             |

## Control verification — attach more rows for all required controls

| Control / exposure | Source, revision & criterion | Safe method / verifier | Actual result / time / status |
|--------------------|------------------------------|------------------------|-------------------------------|
|                    |                              |                        |                               |
|                    |                              |                        |                               |
|                    |                              |                        |                               |

Use applicable regulatory, manufacturer, procedure, permit or engineering criteria. Only appropriately competent and authorized people perform checks; do not improvise tests or enter danger to verify protection.

Unresolved item / restriction: \_\_\_\_\_

Action owner / due before exposure: \_\_\_\_\_

Correction / recheck result and time: \_\_\_\_\_

Stop contact: \_\_\_\_\_ Restart authority: \_\_\_\_\_

Next recheck trigger: \_\_\_\_\_ Crew rebrief completed: \_\_\_\_\_

Disposition: [ ] HOLD affected work [ ] Checks complete; required approval confirmed

Approval / permit reference or justified N/A: \_\_\_\_\_

Leader / date / time: \_\_\_\_\_

**Unverified required protection means HOLD. Correct, recheck, obtain required site authorization and rebrief before exposure.**

This sheet supports the task plan. It does not replace required permits, inspections, specialist decisions or employer authorization.
