

# Supervisor Field Check

Electrical Work: Verify the Boundary | v1.0 | October 7, 2026

Task / location: \_\_\_\_\_

Date / time / shift: \_\_\_\_\_ Leader: \_\_\_\_\_

JHA/JSA reference / revision: \_\_\_\_\_

Change or conditions confirmed unchanged: \_\_\_\_\_

## Short leader check

Mark V = verified, H = hold/not verified, or N/A with a reason. Support each result with evidence below or a referenced task record; a blank is not a pass.

| Check                                                         | V / H / N/A |
|---------------------------------------------------------------|-------------|
| Equipment and task identification match.                      |             |
| Applicable procedure and qualified electrical lead confirmed. |             |
| Required status verification and restrictions documented.     |             |
| Barriers and safe adjacent routes physically checked.         |             |
| Entry authority and change communication understood.          |             |

## Control verification — attach more rows for all required controls

| Control / exposure | Source, revision & criterion | Safe method / verifier | Actual result / time / status |
|--------------------|------------------------------|------------------------|-------------------------------|
|                    |                              |                        |                               |
|                    |                              |                        |                               |
|                    |                              |                        |                               |

Use applicable regulatory, manufacturer, procedure, permit or engineering criteria. Only appropriately competent and authorized people perform checks; do not improvise tests or enter danger to verify protection.

Unresolved item / restriction: \_\_\_\_\_

Action owner / due before exposure: \_\_\_\_\_

Correction / recheck result and time: \_\_\_\_\_

Stop contact: \_\_\_\_\_ Restart authority: \_\_\_\_\_

Next recheck trigger: \_\_\_\_\_ Crew rebrief completed: \_\_\_\_\_

Disposition: ☐ HOLD affected work ☐ Checks complete; required approval confirmed

Approval / permit reference or justified N/A: \_\_\_\_\_

Leader / date / time: \_\_\_\_\_

**Unverified required protection means HOLD. Correct, recheck, obtain required site authorization and rebrief before exposure.**

This sheet supports the task plan. It does not replace required permits, inspections, specialist decisions or employer authorization.
