Ask your supervisor

Sector 21 / Mining, Quarrying, and Oil and Gas Extraction. Type in the fields or print the three pages and write. Start at a meeting point the host has approved.

This is not MSHA miner training.

This overview and walkthrough give no credit under 30 CFR Part 46 or Part 48. This sheet is not a mine training record and does not grant entry or permission to work.

Allow 30–60 minutes total for the online orientation and the walkthrough with your supervisor.

Worker or crew member

Supervisor, foreman or host contact

Site, gate or meeting point

Walkthrough date

01 / Before entry or the first task

Which site, age and task limits apply? Who confirms required training and access?

What is my first assignment? What must wait for separate instruction?

Show me the approved waiting point, walking route and no-entry areas.

Which PPE and controls do I need? Where do I check fit and replace damaged gear?

Try asking, “What do I still need before I can go farther?”

Find it together

Ask for a demonstration from an authorized location. If a resource is inside a restricted area, ask how to reach it safely. Record unanswered questions on page 3.

02 / Emergency arrangements and chemical information

How do I raise the alarm, report an injury or near miss, and contact the lead?

Which alarm and evacuation instructions apply? Where is our meeting or muster point?

Where is the first aid kit? Who can provide first aid and how do we call for help?

Where are the extinguishers and escape routes? What should I do in a fire?

How do I get labels and safety data sheets (SDS)? Where are wash facilities?

What site name, gate, road or other location should I give responders?

What is the backup if a radio or phone fails? Who meets responders?

Show it back

Choose the prompt for your work. Explain the agreed plan in your own words. Your employer and site operator keep any required training and authorization records separately.

03 / Choose a setting

Surface mine or quarry
Who controls the haul route, highwall closures and blast all-clear?

Underground mine
Where do I wait on the surface? Who checks entry and explains escape arrangements?

Drilling or well servicing
Who controls the rig floor, load path and pressure-test boundary?

Oil or gas production
Show me the observation point, gas alarm response and lease check-in plan.

Contractor or field support
Who is the host for this stop? Where does the agreed handoff end?

04 / Record the next action

In my own words, what is the safe plan for my first assignment?

What question remains open and which task or area must wait?

Who will answer it? When and how will we confirm the answer?

Keep this sheet for the employer's onboarding process. It does not certify the worker.
